2018-09-26 2024-05-19

COURSES HANDLED

Networking 1(LAB)

Networking 1(LEC)

Readings in Philippines History with Indigenous People Studies

Strategic Management

PROJECTS

GC-FaMS

The Gordon College Faculty Monitoring System (GC-FaMS) is a "Faculty Profiling and Development Monitoring" web-application which provides a centralized system for management, and profiling of faculty members across different programs within the school. This enables a centralized system to consistently monitor the quality and development of multiple areas of programs to be accredited for a higher level of education, which streamlines the entire process of the overall program development.
